This eBook is not prescribing my way as the only method and right way to trade and invest in the Philippine Stock market. This is simply a sharing of my personal and individual journey through the years. I acknowledge that learning is a lifetime pursuit and some information may have changed as of this writing.

# TIPS PARA MAKA-IWAS SA SCAM

## TIP #1

### MAKE SURE NA MAY SARILI KANG ACCOUNT SA ISANG STOCK BROKER

Before you can buy shares of stocks in our country, you need a broker to trade and invest in the Philippine stock market.

You have the option of hiring a human broker but it comes with a cost or you can open an online trading account and do it yourself.

## HOW TO CHOSE AN ONLINE BROKER

Consider that the minimum starting capital or the minimum deposit to open an account varies. It can range from no minimum deposit required (usually in banks where you have a savings account) to ₱100,000.

Consider ways of funding the account. There are different ways like online bank transfer, Gcash, etc. See if your bank is listed on their preferred ways of funding so it's convenient for you both on funding and withdrawal.

# CHOOSE ONLINE BROKER

Consider their mobile app if you are always on your phone. Check out their user interface and ease of navigation. It keeps you track of your orders even while on the go.

Consider their physical branch location if you consider wanting to talk face to face with someone from the brokerage firm.

Consider their social media presence and customer service responses. Check how fast and how friendly they respond to email, calls, messages and social media accounts. It's also great to see brokers with Youtube channels so you can watch tutorials about investing and about their platform.

Consider if the broker also offers other options for investment products like mutual funds. This can help you to diversify your portfolio while only keeping one broker to monitor your investments.

## TIP #2 LOOKOUT FOR PROMISES

Avoid those who are offering promises of guaranteed earnings.

Avoid those promising of 'NO RISK', 'SURE BALL 'to" pero ending kailangan mo palang mag-invite to profit.

Avoid those promising you will be rich in a short period of time.

Avoid those promising you will have 100% guaranteed returns.

You need to understand how the investment will work and where will your money go. Walang sure na return at profit sa investments - hindi ito MAGIC!

# TIP #3 "WALA AKONG GAGAWIN"

## "Wala-akong-kailangang gawin-scam"

Madalas ko itong makita - "madali, walang gagawin, kikita ka na". Eh kung madali at walang gagawin tapos kikita ka na bakit ang dami pa ring mahirap na Pilipino. Bakit marami pa rin na-s-scam ng ganito?

Balik ulit tayo sa tip#2. Nakaka-enganyo kasi naman talaga yung may mag-p-promise sayo na yayaman ka tapos sure ball pa.

Kung gaano kabilis makapasok sa stock market ganon din kabilis umalis ang mga nagsisimula dito. Bakit? Dahil kapag pumasok na yung time and effort para pag-aralan at mag-improve ng investing o trading skill aayaw na.

Bakit ayaw ng effort? Bakit mas gusto yung easy money at easy success?

**Take time to understand what you are getting yourself into.**

## TIP #4 WHEN GREED SET IN LOGIC GOES OUT

**"Pahiramin mo muna ako ng P300,000, babayaran kita kinabukasan kasi kikita ito ng 5 million"**

Exact words my friend told me when she called me late at night. Hindi makatulog sa laki ng offer na binibigay sa kanya.

Ang sistema, papautangin daw niya ng P150,000 yung kakilala niya para mabayaran yung permit para ma-release yung stocks na worth 5,000,000. Tama ang iyong nakikita. Tumataginting na limang milyong piso.

Good deal diba?

Pero ang pinagtataka ko nagmamadali daw yung tao na kausap niya. Dapat ngayon mayroon na siyang maibigay na P300,000. Ang sabi niya, sa lunes pa kasi siya magkakapera.

Alam mo kung anong sinabi? Ang sabi, "Ah sige kahit sa Monday na lang, kahit P150,000 na lang."

What? Ano? Teka ang gulo.

**When Greed Set In, Logic Goes Out.**

# QUESTIONS TO ASK YOURSELF

Kakilala mo ba yung kausap mo? Kung oo, saan mo nakilala? Kung hindi mo kakilala = Avoid na!

Intindihin kung para saan ang pera na ilalabas mo, saan ito mapupunta, at paano ito kikita. Tip: Kung hindi maintindihan magtanong sa educated sa mga ganitong bagay.

Don't be greedy. Be educated. Stock market investing does not profit overnight. If you are trading stocks, you can earn in a shorter period of time, even for 5 minutes but it takes skill. And when I say skills, trading skills where you need to learn technical analysis - which by the way also does not happen overnight.

Be careful sa scenarios na 1) kailangan mong maglabas ng malaking pera 2) may time pressure at kapag hindi mo tinamaan ang time dealine you will lose the opportunity daw. Bakit nagmamadali? May lakad ba?

# MISCONCEPTION REVEALED

*Di ko alam kung ano ang stock market...*

*Di ko alam kung ano ang trading....*

*Di ko alam kung ano ang investing...*

*Di ko alam yung opportunity to earn...*

Maybe you are like me.

Lumaki ako sa isang pamilya na hindi naman kami mayaman.

Yung mga magulang ko, employed din sila. Nag-venture sila sa business pero hindi sa investments.

At katulad ng marami, we lived the normal life na you work, you earn, and you feed your family.

I heard a lot of misconceptions. And even when I tried to learn and start, a lot of my friends discouraged me.

Sadly, I listened to them (and I believed these lies for years).

And maybe you are like me and you heard the same.

## SUGAL YAN. STOCK MARKET IS GAMBLING.

Kapag hindi mo totally naiintindihan ang investment na pinapasok mo, o kahit business pa yan – surely magiging sugal talaga yan.

Ang pinagkaiba ng stock market, maaari kang gumawa strategy mo.

Kaya para sakin hindi sugal ang pag-invest o pag-trade stock market. Pero kung wala kang strategy, panigurado ako magiging sugal lahat ng gagawin mo.

## PANG MAYAMAN LANG YAN.

This was true years and years ago. And maybe you heard this phrase “The rich get richer and the poor get poorer.”

The rich people invested their money when the stocks were cheap and when the stock prices increased, they sold their shares at a higher price. Kaya sila din yung yumayaman.

Pero ngayon, we live in one of the greatest times because the stock market is made available to normal people like you and me.

## KAILANGAN MONG BANTAYAN O TUTUKAN YAN.

Maaaring narinig mo na rin na kailangan mong minu-minuto na nakabantay sa computer, na dapat tinititigan mo ang mga aksyon at galaw ng charts at presyo ng stocks.

May mga strategy na ganito sa trading pero may mga strategy din naman na hindi.

Yung chill ka lang.

You can be faithful in your day job and still be successful in the stock market. You can still have a full-time job and still trade and invest.

## GET-RICH-QUICK

Ang stock market ay hindi rin madaliang pera.

Ang tingin ng tao na madali kang yayaman sa stock market at madali kang magiging milyonaryo na para kang nanalo ng jackpot o nanalo sa lotto ay isang misconception.

I get questions like, "Cristina mag-invest ako ng 5,000. Kailan magiging 1,000,000 yung pera na i-invest ko?"

Maraming possibility sa stock market where I've seen 100% gain in one month but again, it is not a guarantee.

Ang stock market ay hindi mabilisang kitaan at hindi ito sigurado. Investing in the stock market is a high risk - high reward investment.

## HIGH RISK NAMAN PALA YAN

Lahat ng bagay na hindi mo naiintindihan risky yan at tulad ng nauna kong statement nagiging parang sugal yan kapag pumasok ka sa isang bagay na hindi mo inaral.

Life is also full of risk. If you will not step out of your comfort zone, if you will not take a leap and if you are not willing to learn to manage your risk – then don't continue reading. This is not for you.

# THE TRUTH ABOUT STOCKS AND THE STOCK MARKET

Ang **stocks** ay shares ng companies.

May mga kumpanya tulad ng Ayala, BDO, SM na nag-o-offer ng shares sa publiko kung saan pwede tayong bumili.

Ang stock ay isa ding financial asset.

Maaari natin ikumpara sa titulo ng isang lupa. Kunwari bumili ka ng lupa noon sa halagang P100 per square meter at pagkalipas ng sampung taon ung property na binili mo naging P1,000 per square meter na. Ibig sabihin nag-appreciate na ung value ng lupa.

Ang asset kasi ay mga bagay na nag-a-appreciate o tumataas ang value over time.

Kaya kapag bumili ka ng stock sa magandang presyo at kapag tumaas na ang presyo nito, yun na yung pagkakataon mo para kumita ng pera.

Vice versa, kapag may binili ka na stock at kapag bumaba ang presyo nito, dun ka naman malulugi.

**Ano naman ang stock market?**

Ito yung parang palengke. Kung sa palengke namimili tayo ng gulay, isda o karne, sa Stock Market naman tayo namimili ng Stocks or Shares.

Here in the Philippines, we have the Philippine Stock Exchange or PSE. Sila yung nag-i-issue ng mga kumpanya para mabili at mai-benta natin.

Hindi lahat ng kumpanya ay pwede nating bilhin, meron lamang tayong 300+ publicly listed companies (you may go to <https://edge.pse.com.ph/> to see all company list)

The Philippine Stock Exchange or PSE also has set times that they operate – parang mall.

They open Monday to Friday (except holiday) from 9:00 AM to 3:30 PM before pandemic. Because of COVID19 pandemic it was shortened to 9:30 AM to 1:00 PM.

If you want to buy stocks from the PSE, you need a broker.

In today's day and age, these are all now available online. You may choose your broker of choice by going to [pse.com.ph](https://pse.com.ph) and look for Trading Participant then Online Brokers.

[Home](#) ▶ [Trading](#) ▶

## Trading Participants

[Online Brokers](#)

[Directory](#)

## Online Brokers

Individual and Corporate Members of the Exchange immediately prior to demutualization who are granted trading rights. Trading Participants may also be called "Members of the Philippine Stock Exchange, Inc."

ALL	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q	R	S	T	U	V	W	X	Y	Z
-----	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---

Ito ang magiging paraan mo para makabili at makapagbenta ng shares.

Tulad ng palengke, the stock market also has buyers and sellers – na tinatawag na Market Participants.

Si buyer, ang gusto niyan tumawad para makuha ang presyo ng produkto sa mababang halaga.

Si seller, gusto naman niyan makabenta sa mataas na halaga para kumita.

For example, yung buyer gustong bumili ng isang kilong manok.

Ang presyo ni seller ay P200 per kilo.

Pero tumawad si buyer na P180 na lang kasi suki naman siya.

Pero ayaw pumayag ni seller kasi lugi siya.

Kaya nagkasundo na lang sila sa P190.

Kapag nagkasundo sila “deal” na yun kaya nagsara na ung presyo sa P190.

This is similarly what’s happening in the stock market daily.

# 3

## MAKING MONEY IN STOCKS

There are two ways to make money in the stock market.

It's through dividends and stock price appreciation.

Dividends yung bonus na binibigay ng kumpanya sa mga shareholders. Dahil part owner o shareholder ka na (kasi bumili ka na ng shares ng kumpanya), kasosyo ka na nila sa kanilang negosyo.

At bilang kasosyo, kung kumita sila o lumago at dahil nagtitiwala ka sa kumpanya nila maaari ka nilang bigyan ng dividends at bilang ganti ay binabahagi nila yon sayo.

Here's an example of a dividend I got from DMC (DMCI Holdings, Inc.) Here, they are giving 0.48 pesos per share of Cash Dividend.

I had 1700 shares during that time.

Let's do the math:  
0.48 Cash Dividends x 1700 shares = 816 pesos  
Minus 10% tax = **734.40 pesos**

Dear Maria Cristina Orlina [REDACTED]

We are pleased to inform you that you are entitled to receive cash dividend as follows:

Stock code	: DMC
Cash dividend	: PHP 0.48 per share
Ex-date	: 04/12/2021
No. of shares entitled	: 1700
Amount to credit	: <b>PHP 734.40</b> (net of withholding tax)

The cash dividend will be reflected in your cash balance on 04/26/2021 (end of day).

Second, you make money in the Stock Market through Stock Price Appreciation.

Like mentioned earlier, daily in the market there are buyers and sellers. These causes the prices of stocks to move. Kaya kapag nakabili ka ng stock na mura and nabenta mo ng mahal, dun ka na kikita.

# 4 STOCK PRICES GOING UP AND DOWN

Prices of stock change every minute every day. Some go up and some go down.

One of the reasons is the law of supply and demand.

For example, kapag Valentines day, ang presyo ng bulaklak mura ba o mahal?

Ang mahal diba?!

Pero bakit nga ba tumataas ang presyo ng bulaklak kapag Valentines. Yung rosas na bente lang nagiging isang daan.

Bakit ganon?

Kasi sobrang taas ng demand. Kahit magtaas si seller ng presyo, dudumugin pa rin siya ni buyer.

Minsan naman kapag mataas ang supply, bumababa ang presyo.

**Naalala mo ba nung sobrang daming supply ng mangga kasi parang naextend yung summer season, hindi agad nag tag-ulan.**

May puno kami ng Indian mango at sa sobrang dami ng mangga na parang di na siya tumitigil sa pagbunga at umay na umay na kami, pinapamigay na namin.

Halos hindi na din siya mabenta sa palengke kasi lahat ng tao sobra na ang supply ng mangga.

Like in the stock market, if the seller overwhelms the buyers stock prices goes down.

In the same way that if the buyer overwhelms the sellers stock prices goes up.

The behavior of buyers and sellers are also sometimes dependent on news report.

# 5

## INVEST WHAT YOU CAN AFFORD TO LOSE

**Tip:** Only invest in the stock market what you can afford to lose. Huwag kang mag-i-invest sa stock market ng iyong emergency fund, ng educational fund ng anak mo, o ng wedding fund niyo.

Dahil hindi ito sure money at hindi din ito easy money.

Ang stock market ay isang investment tool. Kaya huwag kang gagamit ng pera na hindi mo kayang mawala sayo.

I do not want you to experience that instead of seeing opportunities in the stock market, you will see disappointments and you will avoid the stock market altogether.

I've read stories where people invested 1,000,000 pesos and saw their money decline to as low as 100,000 pesos because they had not fully understood what strategy to use in investing in the stock market.

First, I'll let you answer the question, how much capital are you willing to lose?

There is no guaranteed investment. There is always a risk involved.

There is a high risk, medium risk or low-risk investment and the stock market is a high-risk high reward investment.

May mga tao naman na may savings sa bank and ayaw lang nila na natutulog yung pera nila doon.

Gusto nila yun i-invest sa something na para kumita naman sila ng pera.

Kunwari may ipon ka sa bank na 100,000 pesos and willing kang mag-risk ng 10,000 pesos para mag-invest sa stock market.

Meaning yung 10,000 pesos na yun kahit manalo o matalo okay lang sayo at hindi mo iiyakan yon dahil handa mong i-risk ang pera na yun.

Same way kapag nag-negosyo ka, huwag mong itataya lahat lalo na kung savings mo ito kasi wala ngang garantisado.

Second is, know what your target or expectation is.

Kapag may bagong investment opportunity ang kadalasang tinatanong ng mga tao ay "Magkano ba ang kitaan dyan?"

Siyempre gusto natin malaman kung profitable ba ito?

Angkop ba ang investment na ito o itong negosyo na ito sa expectations ko?

Gusto natin madalas mabilis yung balik ng pera satin, o mabilis ung ROI o return of investment.

Kaya kadalasan kapag nakakita tayo ng double your money naniniwala agad tayo, kaya kadalasan na-s-scam tayo kasi nagiging greedy tayo.

Ito ang mahirap na parte kapag masyado tayong greedy at yun ang ginagamit ng ibang tao para manloko at para sa pansarili nilang kapakanan.

Kaya huwag kang maniniwala sa mga too good to be true na investment tools na “garatisado to”, “100% kikita ka”, “dodoble ang pera mo in 2 weeks” kasi kung totoo man yun baka may illegal na nangyayari dun.

Sa bank, kapag naglagay ka ng savings magbibigay yun ng return na 0.25%. Yan lang yung expected mong return.

Sa stock market, mas malaki ang potential pero kung bago ka pa lang at ang target mo is kumita agad ng malaki in a short period of time baka hindi ito ung investment tool na para sayo.

Isipin mo ng sampung beses bago ka mag-desisyon. Huwag kang masilaw sa mga kinita at resulta ng ibang tao na hindi mo naman nakita ang pinagdaanan nila.

But if you are willing to continue reading and learning muna, tuloy lang tayo kapatid.

*Just Keep on*  
**GOING**

# 6

## FINDING OUT IF STOCK MARKET IS FOR YOU

### **Bakit mas maganda mag-invest sa stocks?**

My answer is my opinion and it may be different for you. The reason I invested in the stock market and the reason why I selected this amongst other investments or business is that I like using the computer a lot, surfing the internet and because I just love learning.

This is also the reason why I love doing online business kasi nakababad ako sa computer at sa internet.

Noong bata ako, I also liked playing games. At itong stock market nakita ko as a challenging game.

Stock market is suited for me kasi kailangan ko lang ng proper strategy, ng proper mindset, at ng capital na pwede kong palakihin.

The things I learned were simple, but it was not easy.

Very rewarding yung investment sa stocks market para sa akin. There are a lot of opportunities out there. Hanapin mo yung opportunity na suited para sayo. Huwag kang matakot na sumubok. At huwag na huwag kang tatamarin na mag-aral.

If you feel like stock market investing is the opportunity for you, do everything that you can to be successful in this.

# 7

## REASONS WHY FILIPINOS INVEST

**One of the reasons is to beat inflation.**

Ibig sabihin kung ang pera mo ay ilalagay mo lang sa bank savings you will not be able to beat inflation rate.

For example, if you leave 10,000 pesos sa bank in one year with 0.25% interest tutubo lang ang pera mo ng 25 pesos.

If inflation for that year is 3.5% average, ibig sabihin yung value ng pera mo nagde-depreciate or nagde-decrease na overtime.

Kaya yung mga tao nag-i-invest, naghahanap sila ng paglalagyan nila ng pera nila na kumikita.

Also, have you heard about diversification?

Yung mga mayayaman kaya lalo silang yumayaman ang hinahanap nilang pagkakagastusan ng pera nila ay assets.

Like I said earlier, the stock market is a financial asset that has a chance to increase its value over time.

Kaya kung marami kang pera, you will just diversify your money.

You can diversify by having assets like businesses, stocks, properties, gold and cryptocurrencies.

You have different cash flow and streams of income that has a chance to increase your money's value over time.

# 8 TRADING AND INVESTING EXPLAINED

Trading is when you are actively buying and selling shares.

It does not mean you have to be watching the market every day and every minute. Some do this as day traders but not all.

Investors naman are passive. Some investors do it by buying shares and then leaving the money or parking it for a longer period like years.

Iba iba tayo ng approach. You can ask yourself what your target is to know if you are a trader or an investor.

Yung return ba na ineexpect mo is to compound your money after 30 years pa?

Or gusto mo ba ng return sa mas maikling panahon at magbigay ng effort, mag-aral at mag build ng skills?

It's a question of do you have time to study whether you want to be a trader or investor?

You need dedication. You cannot just ride on what others are saying to you. That's not an effective strategy. Marami ng pangarap na naglaho dahil nakinig sa iba.

Are you willing to take more risk? Handa ka ba sa chance na malugi ng malugi? Kaya mo bang makita na ang kapital mo ay nababawasan?

# 9

## THINGS YOU NEED BEFORE I START

Napakarami kong naging pagkakamali noon na sana nalaman ko ng mas maaga bago ako nag-invest.

At ngayong may mas alam ka na, at kahit papaano ay may idea na kung ano ba talaga itong stock market, alamin naman natin ano ang kailangan mo para makapag simula?

Una, knowledge.

Kailangan naiintindihan mo na kung ano ba itong stock market investment.

Paano ka kikita, paano ka malulugi, ano ang strategy na gagamitin mo.

These factors are important to consider not only in stock market investing but applies to all other investments and even in business.

If you know my story, marami na rin akong perang nasunog at nawala dahil hindi ko naiintindihan ng buo ang pinapasok ko. Talaga lang malakas ang loob ko noon.

Pero hindi ka matutulungan ng lakas ng loob lang 'dre.

It took me a while to understand yung paulit ulit ko din sinasabi sa iyo na, walang easy money at walang sure money.

Pangalawa, syempre kailangan mo ng capital. You need cash. I see people post on Facebook, "No cash required, pm is the key"

Paano ka gagawa ng pera kung hindi ka magpo-produce ng pera?

If you can initially invest 1,000 pesos, are you expecting your money to be 1,000,000 in one year. Nagmamadali ka ba?

# 10 ZERO + ZERO = ???

If you do nothing, guess what will happen?

Surprise!

Siyempre, nothing will happen.

Friend, walang saysay lahat ng napanood mo, nabasa mo at napag-aralan mo kung wala ka din gagawin sa sitwasyon mo.

Kung naghihintay ka pa ng pasko para may mas malaki kang capital okay lang naman pero bakit ayaw mo pa rin mag-start kahit may 1,000 ka naman na?

The first step you can take is to take the first step.

And the first step is to open an online trading account.

If you are still reading this up to this point, you are already a chapter ahead of your friends na wala talagang idea kung ano ang stock market. You are already a step ahead.

# DO NOT RUSH

**Investment should be benefiting you not destroying you.**

That is why investing in the stock market is not a get-rich-quick-scheme. This is not a one-snap-and-you're-rich kind of thing.

Learning takes time but it's going to be worth it.

Do not rush yourself.

This is not a race na paunahan kumita ng pera sa stock market.

Also, do not put yourself in a situation na pagsisisihan mo din sa huli.

I've done that and lost more than -70% because I was stubborn and rushing.

That's why I'm so passionate about creating contents, eBooks, lessons, courses and even masterclasses to educate more and more Filipinos on how to trade and invest.

# DO YOU WANT SOMEONE TO HELP YOU STEP BY STEP AND SEE HOW IT'S DONE?

Obviously, I can't teach everything in this small eBook and I know it might look like a lot of work to you.

You may be saying, *"Hindi ako magaling sa math", "Hindi ako techie", "Slow learner ako"*.

Or maybe you are saying, *"What if I lose money in this investment?", "What if I chose the wrong stock at malugi ako?", "I'm a newbie and what if I'm choosing the wrong move?"*

My question to you is this:

Do you want to LEARN? Do you want to EARN?

Do you want to know HOW TO START even if you have zero knowledge, no experience in trading and investing and no big capital to invest?

**Hey, listen I was in your situation before. I was a total beginner with No Knowledge, No Experience and No Big Capital to invest.**

How did I do it?

I gave myself only 2 choices.

Choice #1 is to go back to what I was doing before. Totally risk-free and still in my comfort zone.

Or choice #2 try this stock market out by learning and applying.

Imagine if I chose number 1. Where would I be today?

So I enrolled in several courses, attended seminars to learn how.

I educated myself and eventually was able to gain profit in the stock market (there had been losses, but the gains outweigh them).

Everything started small for me.

Kasi hindi naman ako genius.

What I did was I took one step at a time until I grew to what it is today.

So, my friend, it's very simple.

You just have to make a choice too.

**LET ME COACH YOU INSIDE THE  
STOCKS ACADEMY**

# HERE'S WHAT PAST STUDENTS ARE SAYING ABOUT STOCKS ACADEMY

## Re: Stocks Academy Masterclass Week 3 Homework

From Kristel Ann Panganiban on 2019-10-07 18:40

Details Plain text

First time ko po mag-analyze ng charts, wala rin po akong alam dati bukod dun sa pagtaas-baba ng price ng stocks sa chart. Buti naman tama ang nagawa ko. Super ni-rush ko po magawa ang homework at pinilit na mai-submit bago magsimula ang 4th masterclass natin dahil marami rin akong ibang trinatrabaho. Thank you po dahil itinuro nyo sa way na maintindihan ng walang idea at nai-intimidate sa technical analysis na tulad ko.

Kristel

Oo super. Ang sarap ng feeling ko ngayon dahil di kana nakikibalita ng bibilin. 😊

Dati nagbabasa lang akong mga post dun sa col group e. Tapos kung ano pag usapan nila un binibili ko without any knowledge. 😊

minsang nagddoubt na din ako if may natutunan ba mga students ko haha buti naman meron

Saka maam. Ung satisfying part is pag tama ung basa mo sa chart. Tapos nag gain ganon. Nakaka boost ng moral saka courage. 😊

i labbet

😊 1

➔ Chack replied to you

minsang nagddoubt na din ako if may natutunan ba mga students ko haha buti naman meron

grabe maam. sayo ko lang malinaw na naintindihan yung mga sinasabi ng mga vlogger.

➔ Chack replied to you

i labbet

ilabbet too. hahaha

# HERE'S WHAT PAST STUDENTS ARE SAYING ABOUT STOCKS ACADEMY

## Re: [Batch 2] New Quest: Building Habits [↗](#)

From [Abigail Alvarez](#) on 2020-07-11 10:45

[Details](#) [Plain text](#)

Hi Coachy!!

Im Abby Alvarez, An Accountant in an International NGO. Now, im full time accountant. Like what i've mentioned before, college palang ako nag ka idea na ako sa stock market pero hindi ko alam noon ang pasikot sikot dito. Ilang beses akong nagtatangkang pag-aralan 'to on my own pero lagi akong nakukulangan ng extra time and wala pa ding pera pang capital. Plus pa yung ibang tao na i-didiscourage ka pumasok sa mundo ng stocks kasi wala naman din silang background kung hindi puro hearsay lang na may mga nabankrupt gawa ng stock market. Pero i must say, kung andun talaga yung urge, passion and dedication mo. Why not try? Buti nga may mga ganitong program na ngayon to help mapadali mong matututunan yung step by step on how to wisely invest sa stock market. **Napakadami kong pinanuod na videos sa YT, finally na group, pero wala akong malinaw na nakuhang step to guide me properly hanggang sa nag decide akong mag enroll dito sa program ni Coach.**

Oo, nung una hesitant ako kasi malaking pera din para sa mga beginners like me for age like 20s ang perang ininvest ko dito. Pero naisip ko, eventually, mababawi ko din naman yung ininvest ko kung mag sisimula na din ako agad. Lalo na't naka sale most of stocks ngayon. Good entry point na din. Dito natest na din yung risk tolerance ko, like sa pag iinvest sa stocks, if low risk, low return. But always remember before u take risky moves, u have to always check background if it is worth the move! (Btw, chineck ko din po yung program ni coach ng maigi, hindi po siya scam. Hahaha) Well, It actually applies in general. Naprove ko dito yung essence nung patience na better if u undergo the process kahit mahaba pa yan (feel mo matagal, kasi yun yung nafeel ko nung una) pero nung natapos na yung program.

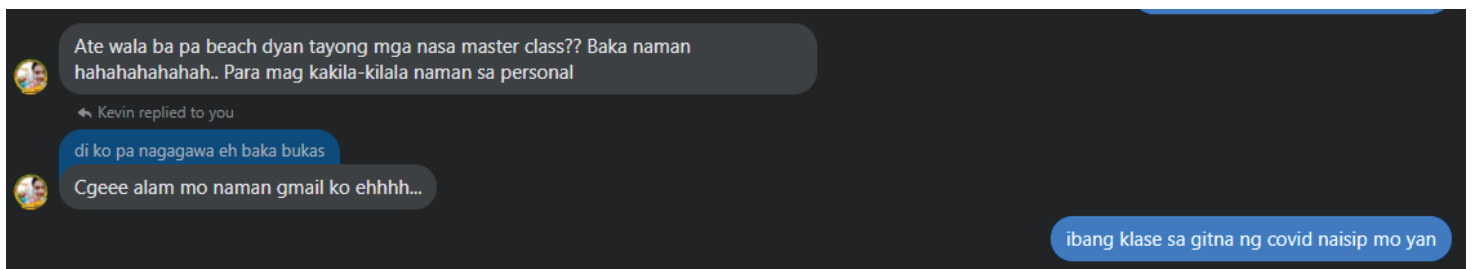

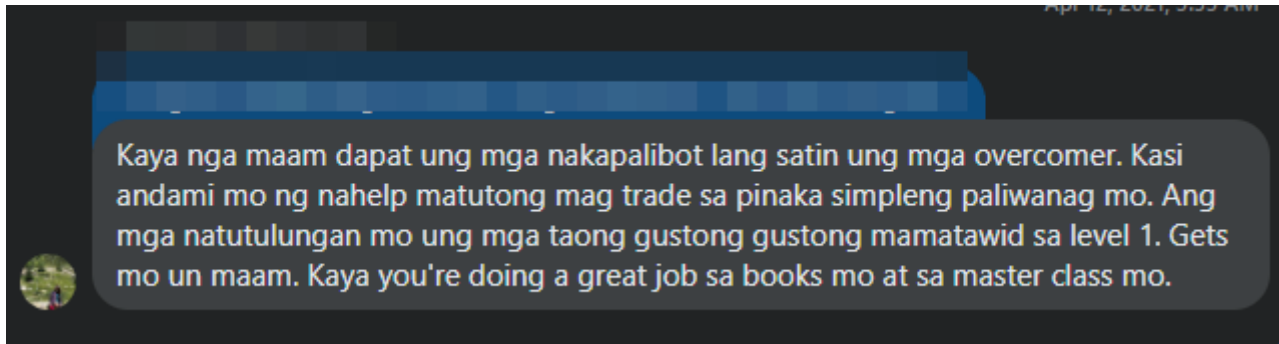

**Na realize ko yung value nung "worth it" na word. Worth it, lahat ng pag undergo ko nung process, kasi napolish yung mga wrong mindset ko sa stocks. Worth it, na nadagdagan yung knowledge ko on how i'll make use of different strategies na natutunan ko para sa next moves ko and madami pa. Sobrang thankful ako dito, Promise. I highly recommend this program para sa mga beginners lang talaga. Yung wala pang idea at all.**

Ngayon, inuunti-unti kong iapply yung natutunan ko. Slowly but surely ang peg. haha Ok lang mabagal, do not compare you're progress to others. Kasi kapag firm na yung knowledge mo dito, eventually madali mo na din malalaro ang stocks. Wag mainggit sa iba na nag kaganito na sa stocks, kasi for sure naka experience din yan ng losses. Hindi lang nahighlight. Also, Do not stop learning din, kapag natapos mona yung program ni Coach. Kasi kahit nga si Warren Buffet continuous parin nag babasa basa for betterment. So never stop learning. **Andyan naman si Coach para tumulong din always(anytime haha).**

If it excites you to learn new things like dito sa stock market. Hindi dahil gusto mo agad yumaman but instead add new experience, knowledge and feel mong yung desire mo talaga matututo is present. ( Thou part yung pag yaman, sinu bang ayaw diba... it follows!) Try

Enrolling in Stocks Academy **is a great investment for novices with zero or little knowledge of stock investing.** Affordable compared to other training courses. Lessons are easy to understand for beginners. Streamlines your learning process so you can save time and start investing in the stock market with confidence.

Re: Assignment for Week 3 Master Class

Created with [TradingView](#)

**Feedback:**  
I am glad that I have enrolled with **Stocks Academy Master Class**, It is just our **3rd Week** going on **4th** and I can say that I have learned a lot from this, your **teaching method is newbie friendly and your trying to simplify topics in such a way that everyone of us will understand**. Also during our online sessions you make it a point that we feel like we were just talking to a friend and **not the usual mentor-student set up, and that makes us comfortable specially in asking questions** that sometimes maybe difficult and awkward to ask if the case was different.

**Take Aways:**  
**Week 1**  
**Setting of Goals**  
- We should have a clear goal why we want to invest in Stock Market as that would be our guide and driving force in case we face challenges along the way.

**Week 2**  
**Investing Strategy**  
- We have Different Types of Investing Strategy that we can choose from, assessing ourselves and checking what would be the best strategy that we can use based on our goals and also with the current funds we would start with.

**Week 3**  
**Technical Analysis**  
- Now I know it is not too complicated to do Technical Analysis, you just need to have a better understanding of the basics(Support and Resistance) and others will follow, **doing constant practice is the key**.

KUDOS Ms. Cris!!!  
That's all I can say for now :)

Thanks,  
Alfie

Good day,

So ayun po. Nagstart na po ako magtrade last week august 4 po. Ginamit ko na po yung **trading diary** na prinovide niyo. Bumili po ako

Nagagamit ko din po yung **stock sorter kung expensive or cheap.**

Katuwa lang na nagkaroon ng profit

kahit small amount pa lang po yung nilagay ko sa account. Thank you po. Maraming Salamat. 😊

Thank you ulit.
